## Environmental Policy

It is our aim to actively work with environmental aspects and improve our environmental performance. By doing so we hope to be a part of a more sustainable aviation business. We are committed to:

- Working to continuously improve our environmental performance
- Working actively to protect the environment and prevent pollution and harm to the environment by applying the precautionary principle
- Ensuring compliance with applicable legislation and other requirements
- Working actively with assessing and eliminating risks in our operation
- Ensuring responsible chemical handling in all aspects of our operation
- Working actively with waste management to increase our recycling rate
- Over time incorporating environmental aspects in our whole operation

We encourage our employees to take an active role in our environmental work in order to continuously improve our environmental management system.
